Teamlead C++ Development for orthodontic solutions

Ormco (www.ormco.com), an OpCo of Envista (www.envistaco.com), is a leading manufacturer and provider of advanced orthodontic technology and services. Distinguished products range from twin brackets to self-ligating appliances to the fully customizable Insignia™ system. Ormco is currently introducing a new digital product line: Spark Clear Aligners. From leading products and personalized service to worldwide continuing education programs and marketing support, Ormco is committed to helping orthodontists achieve their clinical and practice management objectives.

The center of excellence of Software Development for Envista, Medicim, is world leader in innovative software solutions for the dental profession. We investigate, develop, maintain and support innovative software solutions for clinicians and dental technicians. Our software solutions create intuitive workflows for image acquisition, diagnostics, treatment planning, prosthetic CAD/CAM and dental team collaboration in order to treat patients better. DTX Studio is our flagship software suite. We want to shape the innovation and the industry.

We are seeking for a teamlead C++ developer to join a newly created team at Medicim, focused on a 3D CAD/CAM Spark software for modern orthodontic solutions in collaboration with the Ormco teams around the world.

Job Description:

- You design and develop software components in C++ for orthodontic software solutions.

- You establish cooperation with global Ormco teams.

- You will be part of creating the Ormco team in Mechelen.

- You work in the agile environment and you are responsible for project architecture decisions.

- You take part in code review, DevOps and continuous delivery.

Your profile:

- You have a Bachelor or higher degree in Computer Science, Engineering or related fields.

- You have experience with C++ programming skills (5+ years of experience)

- You have experience of software architecture and design. Also computational geometry/3D has no secrets for you.

- You are passionate about software and technology.

- Experience as a team lead or technical lead for complex web applications is required.

- You have an intellectual curiosity. Regardless of your background, you will encounter new technologies and problem domains in our environment.

- You are a strong problem-solver and can thrive in a fast-paced, challenging environment.

- You are fluent in English.

Our offer:

- Our work environment is informal, collaborative and supportive of individual growth in talent and leadership.

- An internationally oriented working atmosphere.

- Focus on continuous learning: internal, external and on-line seminars, attending international conferences.

- A challenging leading edge and inspiring working environment which makes a contribution to human health and human convenience.

- A competitive salary package with extralegal advantages such as: group insurance, hospitalization insurance, meal vouchers, ...
